Empowering People. Strengthening Communities.

Who we are

Ascentria Therapeutic Family Connections (TFC) offers a variety of home-based and specialized foster care services designed to serve New Hampshire children in need of intensive level supports.

How we help

Child Health Support Services assists families with parenting skills and helps to establish a safe and positive home environment. These services may include: parent coaching, behavior management, nutrition training, parent-child communication skill building and other community resources.

Home Based Therapeutic Services provides a more intense, short-term service that helps to stabilize and strengthen families who are at risk. In addition to on-call support, therapists provide individual and family counseling to enhance parenting skills, encourage self-sufficiency and increase safety in the home.

Independent Service Options (ISO) In-Home support offers the most intensive level of in-home support. This program includes individual and family counseling, on-call emergency support, respite breaks, crisis management, treatment plan development, transportation and advocacy with schools and health providers.

Independent Service Options (ISO) Foster Care provides a safe, nurturing environment for New Hampshire children. Many have a history of abuse or neglect which can lead to challenging behaviors. Ascentria licenses foster homes that serve children with intensive level needs. Foster parents receive many services to help them care for a child including: training, financial reimbursement, clinical and on-call emergency support and respite breaks. Interested in becoming a foster parent? Please contact us!
